

AluRad Wi-Fi

Electric Radiator

*Smart, modern electric heating
with built-in Wi-Fi*

AluRad Wi-Fi Electric Radiator

The AluRad Wi-Fi electric radiator from Dimplex combines stylish design, energy efficiency, remote control, and a durable recycled aluminium construction for effective and eco-friendly heating.

AluRad Wi-Fi from Dimplex is an affordable, stylish electric radiator designed to seamlessly match the aesthetic of traditional wet radiators, making it a perfect fit for various interior design styles. This slimline, robust radiator sits just 13 cm off the wall and features a 100% recycled aluminium chassis.

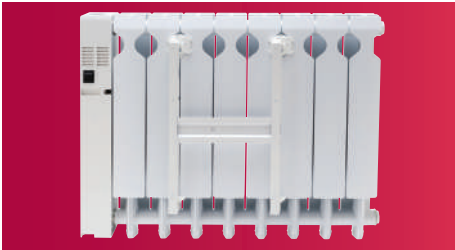

Offering the latest in energy-saving technologies, AluRad Wi-Fi is Lot 20 compliant, featuring a highly accurate electronic thermostat, seven-day timer profiles with multiple time periods per day and Open Window Detection technology.

Built-in Wi-Fi connectivity allows for remote operation via the Dimplex CapaConnect app without the need for any additional accessories.

With five different output options, AluRad Wi-Fi is a versatile and competitive solution, making it an excellent choice for whole-house installations, extensions, and refurbishments. Its completely sealed unit design makes it an attractive proposition for light commercial applications, where durability is crucial. The anti-tampering Key Lock function allows limiting the use of the thermostat, if required, to ensure efficient operation of the radiators.

Oil-based technology provides both radiant and convected heat, ensuring a gentle and gradual heating experience.

Installation of AluRad Wi-Fi is quick and easy with the included H-frame wall bracket.

The intuitive onboard controls and a clear LCD screen with large numerals and symbols make operation effortless.

Manufactured in Europe, AluRad Wi-Fi ensures quality and reliability, offering a stylish twist on conventional radiators for a modern yet traditional look.

CapaConnect app allows you to manage AluRad Wi-Fi remotely:

- **Control:** Control multiple heaters in a single app.
- **User Access:** Share access with others in your home or remove those who no longer need it.
- **Lock/Unlock Product Controls:** Secure your heater by locking or unlocking controls to prevent unauthorised temperature changes.
- **Schedule:** Design a personalised heating plan for maximum comfort and energy savings.
- **Manual Override:** Swiftly bypass your schedule to conserve energy when departing home unexpectedly or to enjoy extra cosiness if you return sooner than usual.
- **Sites & Zone:** Organise your heaters into sites and zones, such as "Bedrooms," to manage them more efficiently and create unique schedules.
- **Updates:** Keep your heaters up-to-date automatically with Wi-Fi connectivity, ensuring optimal performance.

The slimline AluRad Wi-Fi is ideal for a variety of interior design options, and especially suitable for smaller rooms or areas where wall space is limited.

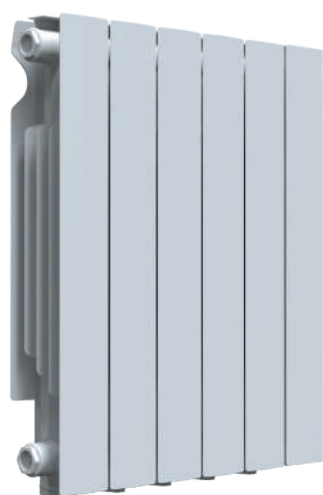

- Wi-Fi connectivity for remote control via the CapaConnect smartphone app
- Robust, 100% recycled aluminium welded finned construction
- Lot 20 compliant for increased energy efficiency
- Seven-day timer profiles with four time periods per day
- Oil-based technology for a comfortable and long-lasting form of both convected and radiant heat
- Manufactured in Europe
- 5-year guarantee with online registration

The design of AluRad Wi-Fi complements a wide range of applications, providing a cohesive look in both residential and commercial settings.

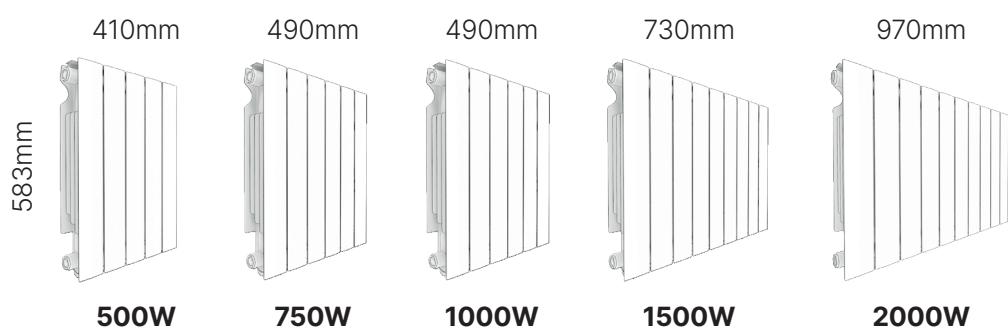

- New build houses and apartments
- Residential refurbishment
- Light commercial sector

AluRad Wi-Fi Electric Radiator
